

the nab is always trying to stiffel technologies they did not think of. These technologies make our lives more convient and fulfilled as well as informed..we pay for these technologies and the nab should have no say as to what the content consists of ..truly the nab is outdated and clearly overextends their precieved authority as well as their precieved rights....to the nab i say sour grapes and mind your own business....leave xm alone...the F.C.C. has better things to do than cater the to needs of the few misguided nab members who should be developing and improving the technologies they have or could have. Instead they concern themselves with what others are doing...Again to them i say sour grapes..mind your own business and quit bothering the F.C.C. and xm satellite radio....No to 04-160 and No to HR 4026
Sincerely, wallace
